

CYBERSECURITY IN LOGISTICS

This research will create a sense of urgency

IMPACT

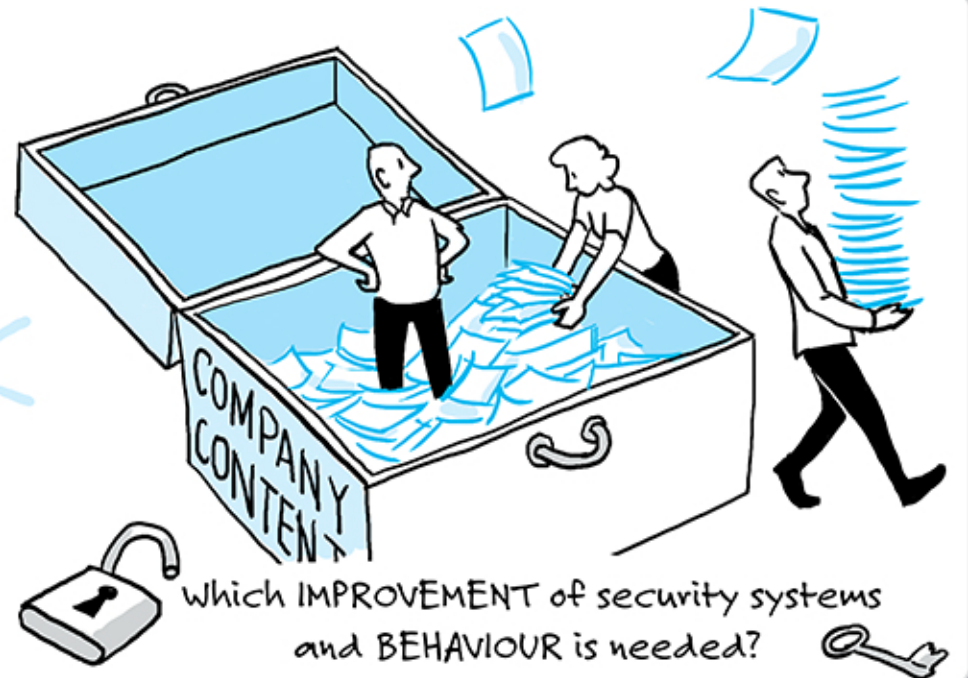

Raise awareness of cybercrime as a threat to the logistic sector

OPPORTUNITIES

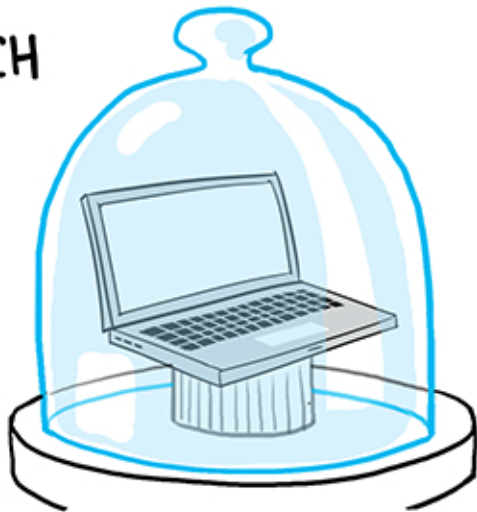

Ethical hacks provide specific information on HOW to improve cybersecurity

which IMPROVEMENT of security systems and BEHAVIOUR is needed?

RESEARCH

With increasing digitization and changing working conditions in logistics, cybersecurity is becoming increasingly relevant

CYBERCRIME
IS ALL AROUND US!

CHALLENGES

Cybersecurity is not the core business in Logistics

often the biggest threat is not the system but human behaviour

Finding respondents for ethical hacks

Port of Rotterdam
